

LOOKING AFTER YOUR AIR CONDITIONING SYSTEMS CAN SAVE YOU MONEY AND HASSLE IN THE LONG RUN...

Welcome to the TRS Maintenance Club

Introducing our TRS Maintenance Club

You might wonder why regular Air Conditioning maintenance is required. After all, a visit from an engineer costs money. You can, in fact, save money by scheduling regular maintenance appointments to ensure a longer life for your units. Having a regular maintenance will maintain the manufacturer's warranty on your equipment.

We offer two different options for domestic customers:

Cooling

based on 1 visit per year- suitable for cooling and occasional heating usage.

Cooling and Heating

based on 2 visits per year – suitable for both heating & cooling usage.

Benefits for Maintenance Club customers:

- Maintains manufacturer's warranty
- Longer life of equipment
- Lower energy bills
- Better Air Conditioning performance
- Discounted Call out fee
- Priority Breakdown service
- Discounted Labour rate on any repairs needed
- Simple monthly payments options

Call us now on

What if I don't have a maintenance contract with you but I have a problem with my equipment?

We are more than happy to attend and carry out repairs on your air conditioning equipment if a fault occurs. An attendance charge and an hourly rate will apply, both billed at our current rates. Any required parts will be charged separately.

Once your Air conditioning is up and running again you can join our TRS Maintenance Club going forward and enjoy some peace of mind knowing we've got you covered in the future!

*prices plus VAT and are subject to change

What does a TRS Maintenance Club contract cost?

The cost of your maintenance contract will depend on how many air conditioning units you have & how many visits you have per year.

For customers whose equipment has been installed by TRS Cooling, the contract includes the call out, plus all labour and consumable parts associated with the annual service/s.

Units that have not been installed by TRS Cooling will need a one-off pre-contract maintenance visit to ensure that your equipment will benefit from being part of our maintenance club. These will not be covered by the manufacturer's warranty.

Club Cooling: Based on 1 visit per year

Required for units that have primary been installed for cooling (but with occasional heating usage)

Club Cooling & Heating: Based on 2 visits per year

Required for units that are used as a primary source of both cooling & heating.

No of units <small>(Indoor & Outdoor)</small>	Monthly Costs <small>Ex Vat (Inc VAT)</small>
2	£11.33 (£13.60)
3	£13.66 (£16.40)

What is included in my TRS Maintenance Club service?

One of our friendly engineers will check, change and inspect (where necessary).

- All filters and Unit Facia are cleaned
- Fan blades and scrolls checked for free air flow
- All evaporator coils and condensers checked for free airflow
- Fan motor bearings are checked
- Condensate pumps inspected and checked (if applicable)
- Mountings are looked at to confirm they are stable
- Drainage is checked
- Check of Wiring connections and inspected for wear or damage
- Controls and thermostats are checked
- Operation test of system- with air on & air off temperatures checked
- We carry out refrigerant leak checks on each system
